

PRIVACY POLICY OF click apps APPLICATIONS

I. WORD DICTIONARY

1. Application – a functional tool, that allows you to manage content, graphics and communication with facebook users. Its rules, presented content and graphics are supplied by fanpage owner, on which application is installed.
2. User – any person who has facebook account, has installed application and has expressed consent to the use of personal data

II. PRIVACY POLICY

§1. General principles

1. Application author and owner of the application copyright is clickcommunity sp. z o.o. headquartered in Kraków, ul. Szlak 77/222, 31-153, Kraków, registered in the National Court Register in Poland by the District Court for Kraków-Centre in Kraków, XI Commercial Division, under the KRS number: 0000416255, later in this document, the company will be called "clickcommunity"
2. Contest or application with all its content and statements are managed by fanpage owner, on which application is installed.

§2. Protection of privacy

Clickcommunity Sp. z o.o. is committed to protect privacy of Application users. Therefore clickcommunity collects only those data and information about users, which are required for proper operation of applications and which can serve to improve it in the future, or to inform about its improvements and new versions. Data of users who visit our site without logging in are not collected or stored on our servers. Clickcommunity Sp. z o.o. strictly adheres to the Polish Act on Personal Data Protection from August 29, 1997 (Journal of Laws No. 133, item 883).

§3. Data storage

Data of user who installs Application on his profile, uses application or participates in a contest are stored in our database.

§4. Verification, modification and deletion of personal data.

Each user whose data is stored, has an access to data related to him for the purpose of verification and modification. The data will be removed at the explicit request of the user. Users who wants to get an access do their data please contact us on: support@click-apps.pl

§5. Use of the Application

Use of the application requires your consent to Application having access to your personal data contained in the "basic information about me" and "my pictures" (your name, photographs, e-mail, link to your profile, etc.), in some cases also another data, the transmission of which the user has agreed. Under no circumstances our applications will not use this data or publish on your behalf any information, if You didn't previously given your permission. So that we can give you an access to the administration panel of the application, we also can ask you which websites you manage. Furthermore, the application requires consent to receive e-mail informing about the status of your account, allowing contact customer support and to inform you about changes in the offer and functionality of click apps service. Application does not collect or store any data beyond the scope of the information necessary for its proper functioning. §5. Use of the user data

§6. Share information about the users

Administrator of personal data is click community sp. z o.o. Click community doesn't sell personal data of the users to third parties or institutions. Clickcommunity may show the statistic sheets about the application functionality to other co-operating organizations, which does not allow for identification of any user. Data can also be shared or leased to owners of Facebook pages who installed our applications and add it to your page, eg for the purpose of contest or other promotion, and other entities under separate contracts with administrator.

§7. The Application installation and use by other parties

Some of applications or their versions may have functions that allow other parties to gather personal user data. Website owners can send e-mail campaigns to the users of the application installed on their sites through the application or separate contracts with the click community sp. z o.o. Campaigns can be sent only to those users who have given consent to the processing of personal data by the site owner and campaign double-opt-in for users who wish to share their data to the application on its website. Website owners can also use the tool "click apps" to create their own database.

§9. Blocking users

click community reserves the right to temporarily or permanently block access to selected or all click apps applications to users who violate good practice during using our applications. Access lock may be imposed on the Facebook UID , email address and IP address. For a violation of good practice we understand first of all :

- attempts to manipulate the results of game time (use the software, time in the operating system , etc.)
- use multiple accounts on Facebook.com by the same person (fake accounts),
- send requests to the application to fake user accounts,
- use " Bots " that simulate using application by real user or operatng on real user account logged in,
- post vulgar content or infringe the rights of third parties,
- use content slanderous minorities or sexual or religious beliefs,
- affecting the application code or trying to otherwise than as provided in the standard operation of the application to transfer data to the server and database .

Click community also reserves the right to permanently or temporarily block access to users without giving reasons.

In addition, ClickCommunity reserves the right to remove from the ranking results and exclusion from the application users for whom there is a suspicion of violation of the rules of this paragraph and the violation of good practice to use the click apps application without having to inform them of the reason for the removal or blockage.
